

Frontend Testing Results

Please find the results of our Frontend testing below:

Tests	Functions/Components Tested	Result
authAPI Tests		
login calls correct endpoint and returns data	authAPI.login(usernameOrEmail, password)	Pass
signup sends data and returns result	authAPI.signup(userData)	Pass
throws error if login fails	authAPI.login(usernameOrEmail, password)	Pass
getProfile returns user data	authAPI.getProfile(userId, updateData)	Pass
getProfile throws error if not authorized	authAPI.getProfile(userId, updateData)	Pass
updateProfile updates user and localStorage	authAPI.updateProfile(userId, updateData)	Pass
updateProfile throws error if failed	authAPI.updateProfile(userId, updateData)	Pass
apiService Tests		
isAuthenticated returns true if user and token exist	apiService.isAuthenticated()	Pass
isAuthenticated returns false if no token or user	apiService.isAuthenticated()	Pass
clearAuth removes token and user	apiService.clearAuth()	Pass
Forecast Slider Tests		
ForecastSlider Component renders slider and formatted time when mode is forecast	ForecastSlider component	Pass
ForecastSlider Component returns null (renders nothing) if timestamps array is empty	ForecastSlider component	Pass
ForecastSlider Component does not render slider if mode is not forecast	ForecastSlider component	Pass
Auth Context Test		
Verifies that login() sets the user and token in localStorage, updates isAuthenticated, and redirects to '/' after a successful API response.	AuthContext.login()	Pass

PlanContext Test		
Tests that addToPlan adds a venue (without duplicates) and removeFromPlan removes it, updating the plan state correctly.	addToPlan(venue), removeFromPlan(venueId)	Pass
